

# How to be a Sphere Champion

New e-learning available now!

*"My team are just back from a humanitarian mission in Lombok and we're now starting a new one in Palu to respond to the earthquake and tsunami.*

*During our missions, we always use the Sphere Handbook to improve quality, responsibility and ensure accountability for our humanitarian actions. We are greatly helped by this handbook."*

Dwi, ASB Indonesia and the Philippines, October 2018

## Dwi is a Sphere Champion. How about you?

Whatever your role in humanitarian action – community member, volunteer, search & rescue, military, government officer, aid worker, trainer, or manager of an NGO – you can promote Sphere and encourage your employer, colleagues and partners to adopt Sphere methodologies and to use the Minimum Standards.

This one-hour e-learning module introduces Sphere, the Sphere Approach, the Sphere Handbook, and the benefits that Sphere can bring to your network and, ultimately, to the people affected by crisis and disaster that you serve.
